DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 through 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Schlachman et al "Schlachman"(6,504,925).

As to claim 1,5,11,13,Schlachman discloses a method of determining a communication partner's technical address for a user (column 2, lines 14-25 and figure 2), comprises: providing a directory that includes at least one technical address (telephone number) and at least one identification to reach one of a plurality of possible communication partners for a user (name or home address)(figures 4-6), based on an input from the user (keys in a keypad or special functions), obtaining at least one possible communication partner form the directory and suggesting the possible

communication partner to the user (figures 4-6) and performing at least one of the preceding steps automatically based on the user's previous communication behavior (column 2, lines 43-50).

As to claim 2, Schlachman discloses performing the step of providing the directory by using at least one directory selected from the group consisting of a public directory, a directory used for a restricted user group, and a user specific directory (claim 16).

As to claim 3, Schlachman discloses providing the directory as a personal directory for the user (abstract).

As to claim 4, 12, Schlachman discloses providing a directory includes obtaining the at least one technical address for each one of the plurality of possible communication partners by recording technical addresses of the user's previous communicating partners over a predetermined period of time (column 2, lines 25-39).

As to claim 6, Schlachman discloses requesting from the user, the at least one identifier for at least one of the plurality of possible communication partners (figure 4-6).

As to claims 7-8, Schlachman discloses input from the user includes information about at least part of the at least one technical address of a desired communication partner (abstract).

As to claims 9-10, Schlachman discloses if the input from the user is ambiguous, perfumed based on the user's previous communication behavior (figure 16).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Boivie et al (4,633,041) discloses a stored directory number is searched from a display station set to obtain the telephone number of a sought after name (abstract).

Sylvan (5,943,055) discloses capable of performing a number of functions, such as, fax mailbox, directory and telephone numbers (figure 1). Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tilahun B Gesesse whose telephone number is 703-308-5873.
